

Assignment Title: Comp41550 – Assignment 1 – HelloUCD (revision 1.1)

Student Name: XiaoYu Peng(Amelie)

Student No: 13200498

Course: Comp41550

Data: 15/01/2014

Assignment 1

Objective

Through this assignment I have learned how to use Xcode 5.0 to construct a simple interface. That include add text and the style of the text, how to import image. Using constraints to adjust the position of the items.

Practice

The point that I achieved in the assignment document

1. Create a new project with Single View
2. Add text “Hello UCD!”.
3. Change the size, color, font, and shadow of the text.
4. Import the image and put the image on the main view

External

Use auto constraints to set the position of those two items:

1. Use center Y alignment and center X alignment to make those two items automatically in the center.
2. Use Equal Heights and Equal Heights to make the space that around the items equal.

Set the background’s color.
